MARK CHIU, M.D.

EYE ASSOCIATESOF NEW MEXICO 4411 THE 25 WAY NE, SUITE 325 823-4411 EYENM.COM

NAME AND DESCRIPTION OF PERSONS AND DESCRIPTION

WHAT WOULD YOU BE NOW IF YOU WEREN'T PRACTICING MEDICINE?

Either a computer nerd or James Bond. I have the [James Bond] theme song as a ringtone on my cell, and I always tell patients that's what I want to be in my second life.

WHAT ONE FOOD WOULD YOU RECOMMEND THAT EVERYONE INCLUDE IN THEIR DIET AND WHY?

Eat salmon two to three times a week. That can help macular degeneration, the leading cause of vision loss that affects 25 percent of the population.

WHAT WOULD BE YOUR NO. 1 HEALTH TIP FOR THOSE AS BUSY AS YOU ARE?

Make sure to save enough time for you and your family to have a quality vacation.

WHEN THE WHITE COAT COMES OFF, WHAT DO YOU LOOK FORWARD TO DOING MOST?

Taking a vacation to a beach in Hawaii or the Caribbean.

IF YOU WERE YOUR OWN TEACHER, WHAT GRADE WOULD YOU GIVE YOUR PENMANSHIP? I'd say I'd still be in sixth grade. That's why we

have electronic health records.

WHY DID YOU GO INTO YOUR SPECIFIC FIELD OF PRACTICE?

I began seeing an eye doctor who was nice enough to explain things, show me photos of the back of the eye, and I found that fascinating. It also fits my personality because I like working with technology and having everything nice and clean, as perfect as possible.

WHAT DID YOU WANT TO BE WHEN YOU WERE A CHILD?

I've always wanted to be a doctor, since both my parents were doctors. As the oldest child, you try to please your parents, becoming a doctor seemed like the right thing to do. It was interesting to me.

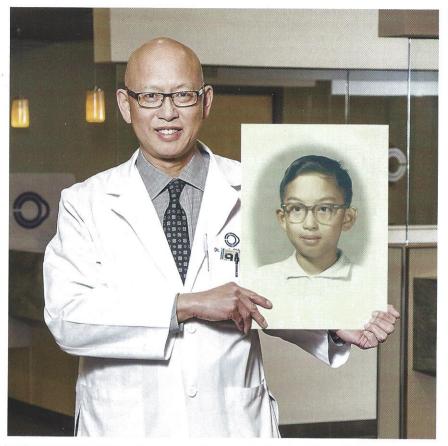

WHAT HAS STAYED THE SAME SINCE YOU BEGAN PRACTICING?

The doctor-patient relationship, along with my earnest desire to take good care of patients, treat their illnesses, and help them through everything.

WHAT'S THE BIGGEST MISCONCEPTION PATIENTS HAVE ABOUT THE MEDICAL FIELD?

That doctors have the cure for everything that

That doctors have the cure for everything that ails them.

These Albuquerque physicians also received votes for ophthalmology.
